CMM xCH Firmware - Release Notes

V4.3 (2024-06-18)

• Changed: Updated GCC compiler version

• Changed: Default values are now active directly after the command was used. No need for a reset.

• Fixed: Bug which sets wrong data baudrate when IsoTP is used to set baudrates

V4.0 (2023-11-28)

• Fixed: Bug which can result in all gates switched off, when CMM is switched on

V3.14 (2023-10-18)

• Added: Command "ReadCurrent"

• Added: Commands "SetTime" and "GetTime"

• Added: Timestamp in command "ReadCurrent"

• Added: IsoTp command "GetSerialNumber"

• Changed: Rename project to IRS-CMM-xCH-FW

V3.12 (2023-10-09)

• Added: FIFO for IsoTP RX messages

• Fixed: Bug which rejected padded IsoTP messages

V3.10 (2023-09-12)

• Added: Legacy mode for cyclic message

• Added: Command LegacyConfig to make ID for legacy mode configurable

• Added: FDCAN command RestoreDefault

• Changed: Rename command IsoTpConfig to LegacyConfig

• Fixed: Bug in SaveConfiguration()

• Fixed: Added missing flag in "send cyclic message"
